to teach  
through  
robotic tools

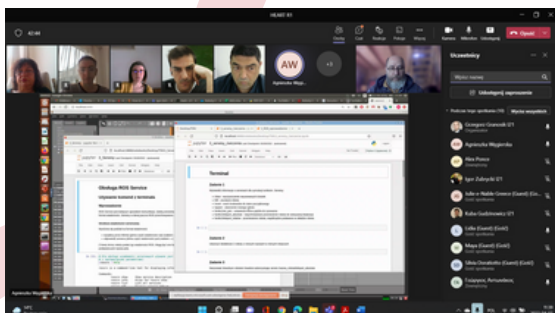

## IN THIS ISSUE:

- Update on the IO's
- Upcoming Transnational Meeting

## ONLINE MEETINGS

Since our latest newsletter, the partners organised two online meetings via Zoom.

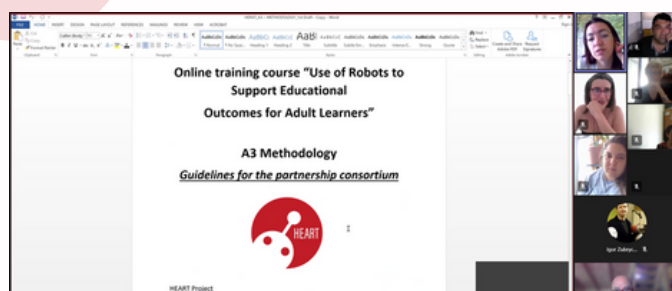

On 7th of April the partnership consortium met via Zoom to discuss the updates and developments. The main objectives of the meeting were to discuss the collection of materials under the Database and the development in interviews and data collection for the creation of the Guide on Educational Robotics.

Another online partner meeting took place on the 26th May 2022.

The partners discussed the project management, provided each other with feedback and updated their progress related to the collection of primary data for the creation of the guide!

The latest online meeting was organised on 17 June! The partners discussed the methodology of the Online Training Course: "Use of Robots to Support Educational Outcomes for Adult Learners"

# Upcoming

## ONLINE MEETING on 15 July 2022

The partners are going to meet once again on 15 July to discuss the final outcomes of the data collection of the interviews under the creation of the Guide.

The partners will further discuss task allocation and project management and the upcoming transnational meeting in The Netherlands.

## TRANSNATIONAL MEETING IN THE NETHERLANDS

The partner Lidi Smart Solutions will host the Transnational meeting in The Hague, The Netherlands on 2nd and 3rd of September. The partner has prepared an information package which includes information about the Dutch culture, the location, public transportation and the agenda.
