# Finalization of Our Project

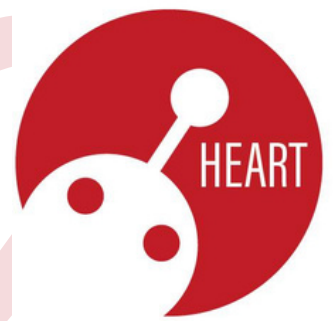

## Project Overview

The HEART Robotics Project is a collaborative initiative aimed at enhancing the use of robotics in adult education, particularly for learners with disabilities. Its key objectives include developing educators' skills in robotics, promoting social inclusion, and improving educational outcomes. The project offers a comprehensive database on educational robotics, an online training course, webinars, and specialized training for trainers. These resources are tailored to meet the needs of adult educators, enabling them to integrate robotics into their teaching practices effectively.

The project started at 01-11-2021 and ends at the end of January.

# Project's Outputs

The HEART Robotics Project has developed several key outputs to enhance the skills of educators in adult education through robotics. These outputs include a comprehensive database on educational robotics, offering a wealth of information and resources.

Additionally, there's an online training course tailored for educators, designed to impart essential skills in robotics education. Based on this the partners carried out a training for trainers in Turin, Italy, which prepared them to support the direct target groups for the use of these results.

The project also features webinars that showcase the essence of our project, webpage, database, enlightening case studies, and invaluable training modules.

Finally we have showcased our project at several international conferences in Poland, between September and November 2023

Join us in this journey to explore the intersection of robotics and adult education, designed to enrich learning experiences. specialized training for trainers, further supporting the professional development of educators in this field.

## Interviews with trainers in the robotics field

# TRANSNATIONAL PROJECT MEETINGS

The HEART Robotics Project has organized several Transnational Project Meetings (TPMs) as part of its initiative. These meetings served as a valuable platform for project partners to collaborate and advance the project goals.

The meetings focused on addressing the remaining project goals and discussing the challenges faced in the project's progression. The final meeting was an occasion for collective reflection on the journey of the project and to look forward with hope to future endeavors that aim for a more profound impact on education and beyond.

# THE CONSORTIUM

Lodz University of Technology  
Institute of Automatic Control

**Coordinator** - Lodz University of Technology which is one of the best technical universities in Poland - <https://p.lodz.pl/en>

ISTITUTO DEI SORDI  
DI TORINO

Turin Institute for the Deaf works from its foundation with deaf people and it's based in Turin, Italy - [istitutosorditorino.org/index.php/en](http://istitutosorditorino.org/index.php/en)

Lidi Smart Solutions in Netherlands was founded to promote the latest trends in the digital era - [www.lidi-smart-solutions.com/](http://www.lidi-smart-solutions.com/)

European Development Foundation EDF established in Sofia, Bulgaria. Its mission is to work for civil society development - [eu-dev.eu/0](http://eu-dev.eu/0)

Associació Programes Educatius  
**OPEN EUROPE**

Association of Educational programmes OpenEurope is a not-for-profit organisation in Reus, Spain - [www.openeurope.es/](http://www.openeurope.es/)

e-Nable Greece is a voluntary organization in Athens, Greece - [www.enabling.gr/en/](http://www.enabling.gr/en/)
